NASA's Mars Perseverance rover

NASA/JPL-Caltech/ASU

Edited and designed by  
Gaile Pranckunaite

Supported by

This is a collection of images collected between February 18 2021 and February 18 2022, daily, from the raw image feed of NASA's Perseverance rover (<https://mars.nasa.gov/mars2020/multimedia/raw-images/>). While traveling through Mars, Percy's cameras capture the vastness of the red planet. The nine categories of images, like the 23 cameras on the rover, will help you see through Percy's eyes and get to know her and the planet. Imagine the silence.

# contents

1 landing	10
2 landscape	60
3 obstacles	138
4 glitches	188
5 sun	230
6 surface	290
7 surfaces	342
8 holes	364
9 horizon	412
